

# EFFICIENCY KITS

The first step  
towards **energy efficiency**  
is no longer a matter of cost

Controls +

+ Saves

Measures +

# EFFICIENCY

## MEASUREMENT EFFICIENCY KIT

Includes:

**EDS + CVM-NET4 + MC3**

+ Control up to 4 different lines, (header, lighting, climate control, etc.) measure when, where and what you are consuming and reduce your consumption curve.

## REACTIVE ENERGY EFFICIENCY KIT

Includes:

**EDS + SMART III + CT\***

+ Use the capacitor bank currently installed in your installation, replacing the current regulator with the **Computer SMART III**. This regulator has a built-in power analyzer which, connected to the **EDS**, can not only check the status of the capacitor bank, preventing penalties imposed due to reactive energy consumption, but also generate the general consumption curve of your installation.

\* Choose 2 CT transformers with a ratio that matches that of the transformer installed in your installation.

## LIGHTING EFFICIENCY KIT

Includes:

**EDS-3G + CVM-NET-MC + CBS-4-C + MC3 + WGS**

+ Measures, controls and protects the 3 phases of your electric panel. Check the total consumption of your installation, protect each phase and guarantee the preventive maintenance of your installation.

Remotely group and control all parameters thanks to **EDS/EDS-3G**: a powerful energy manager with embedded PowerStudio, capable of displaying all electrical variables recorded by the power analyzers or other field devices with its built-in WEB and XML Server.

## CVM-NET4 Analyzer + EDS

+ 3 **MC3** Efficient transformers

## Computer Smart III Regulator + EDS

+ 2 **CT** Measuring transformers

## CVM-NET-MC Analyzer + EDS-3G + CBS-4-C

+ 1 **MC3-250** Measuring transformer

+ 3 **WGS-25** Earth leakage transformers
