### Descripció

In industrial settings, managing facilities and converting large volumes of data into useful information is a constant challenge.

Scout transforms the data from your installations into alerts provided using an advanced analysis system. Centralize information and streamline decision-making on a single collaborative platform, guaranteeing quick and effective responses. It also offers specialized analysis tools and a mobile app to keep you informed and in control from anywhere.

#### Main characteristics:

- **Multi-site monitoring**  
Manage and monitor multiple installations from a single platform. Consolidate all the information in one place for a comprehensive overview.
- **Prioritized alerts**  
Receive alerts generated from an advanced data analysis to focus quickly on the most critical problems.
- **Clear and contextualized information**  
Each alert includes relevant information and recommendations so you can take informed decisions and deal with any issues efficiently.
- **Collaborative communication and analysis tool**  
Use real-time chats and specialized analysis tools in independent spaces to collaborate and share information with your team.
- **Mobile app**  
Manage alerts and collaborate in real time from anywhere with instant notifications and access to detailed information in the mobile app (Android and iOS).
- **Generation of advanced reports**  
Create and share clear and structured reports based on the data from your facilities.
- **Easy to implement**  
Integrate devices into the platform easily using a unique identifier, and start monitoring in minutes.
- **Maximum end-to-end security**  
Trust top-tier ISO 27001-certified cloud providers, with robust privacy policies to protect your information.
- **Flexibility and scalability in the cloud**  
Adapt the capacity based on your needs with a fast-implementing platform to ensure unlimited growth.
- **Interoperability**  
Connect to your existing tools using an open and documented API to improve your workflows.
