Description

Modular indoor energy storage solution for connecting in parallel to the grid, NMC lithium technology. Expandable initial capacity of 73 kWh and 25 kVA of power (up to 73 kVA), which can be extended to 16 units in parallel in groups of 4

- o All-in-one AC-coupled plug & play solution.
- o Rated capacity of 73 kWh.
- o From one to three three-phase next-generation 4Q inverters of 25 kVA each, up to a maximum of 73 kVA.
- \circ Complete energy management system with cloud connection to monitor all the installed systems, and a remote maintenance service.
- o IP 55 enclosure with air conditioning for installation in any type of location.
- o Fire protection system as per the VDE-AR-E 2510-50 standard.
- o Improved maintenance thanks to the 19" racks (battery, BMS, inverter, ControlShield modules).
- o Internal and external protection against voltage spikes and lightning.
- \circ Additional UPS system for safe operation during power outages.

Application

- Electromobility
- o Agriculture
- Industry
- o Tertiary sector
- o Reduction of power spikes
