Description

Panel-mounted digital instruments that display the value of an electrical variable measured or proportional value of a process signal on its screen (depending on the model). Designed to supervise, regulate and control units with the use of relay outputs that are built in the unit.

The DCB series displays the value of an electrical variable measured or proportional value of a process signal on its screen (depending on the model). The unit displays the electrical parameters of a single-phase installation, depending on the model, such as the voltage, current, etc. In DC systems, the unit can measure the voltage, current, frequency and other variables associated with industrial processes. The AC models take the measurements in true RMS (TRMS).

All models in this range have the following features:

- $\circ~$ Universal power supply at 80 ... 270 $V_{ac/dc}$ and optional power supply at 24 V_{dc}
- \circ IP 54 protection degree on the front panel
- o High measurement accuracy
- o Programmable measuring input
- \circ Alarm delays and interlockings
- o Galvanic insulation between external circuits
- $\circ \ \ \mathsf{Self\text{-}configurable} \ \mathsf{decimal} \ \mathsf{point}$
- o Can be installed on 48 x 48 or 72 x 72 mm panels, depending on the model

Application

These digital instruments have many different applications and can be used in:

- Industrial applications
- Air conditioning units
- Solar photovoltaic energy installations
- o Industrial process control systems

Specifications

Installation category	CAT III 300 V
Consumption	2.2 4.2 VA
Frequency	50/60 Hz
Nominal voltage	80270 V ~
DC power supply	
Installation category	CAT III 300 V
Consumption	1.2 1.3 W
Nominal voltage	80270 Vdc
invironmental characteristics	
Protection class	Front: IP54, Rear: IP20
Relative humidity (without condensation)	≤ 95 %
Storage temperature	-40 +85 °C
Working temperature	-40 +70 ° C
