

CC-G

CC-G, Isolation transducer

Code: M25610. DESCATALOGADO

> Output type: 1

> Analog output: 0...20mA > Measure: 500 μA ... 10 Adc

Description

The CC-G transducers, convert D.C current to D.C process indicator signal, and it can be used for galvanic separation between the input and output circuits.

The analog output is directly proportional to the input signal.
