

CVM-MINI

Code: M52000. **DESCATALOGADO**

> Power analyzer

> Input current: .../5 A | .../1 A

> Mounting: DIN rail

Description

Three-phase power analyzer (balanced and unbalanced), assembly on DIN rail, with a very compact size, and 4-quadrant measurement.

Other features include:

- Current measurement .../5 or .../1 A or .../250 mA, .../333 mV
- \circ DIN rail format of only 3 modules
- Assembly on 72 x 72 mm panel with adapter front panel
- o RS-485 Communications (Modbus-RTU) depending on model
- o It features two transistor outputs (programmable)
- $\circ\;$ With ITF technology: galvanic insulation protection, depending on the type
- o Selection of parameters to display
- Selection of the default page
- Universal power supply (optional)
- o Sealable

Application

- \circ Control application on switchboards and low and medium voltage connection points, where an analyzer must be installed on a DIN rail due to space restrictions.
- O Alarm control. Maximum value, minimum value and programmable delay.
- o Control of active or reactive energy using the impulse output.
- o Instantaneous data capture, maximum and minimum values of the electrical parameters measured.

Three-phase power analyzer, assembly on DIN rail

Code: M52000.

Specifications

Consumption	3 VA
Frequency	5060 Hz
Nominal voltage	230 Vc.a.(-15+10%)
fechanical characteristics	
Size (mm) width x height x depth	53 x 85 x 85 (mm)
Envelope	Self-extinguishing V0 plastic
Fastening	DIN rail 46227
Weight (kg)	0,16
nvironmental characteristics	
Protection class	IP 51 (Front), IP 31 (unmounted)
Relative humidity (without condensation)	595%
Working temperature	-10+50 °C
tandards	
Certifications	CE, UL, VDE
Electrical safety, Maximum height (m)	2000
Electrical safety, Installation category	CAT III 300V / 520V, IEC 61010
Standards	IEC 664, VDE 0110, UL 94, IEC 801, IEC 348, IEC 571-1, EN 61000-6-3, EN 61000-6-1, EN 61010-1, EN 61000-4-11, EN 61000-4-2, EN 61000-4-3, EN 61000-4-4, EN 61000-4-5, EN 55011
urrent measurement circuit	
Nominal current (In)	In/5A , In/1 A
Permanent overload	1.2 ln
Maximum input current consumption	0,75VA
oltage measurement circuit	
Frequency measuring range	45 65 Hz
Nominal voltage	300V Ph-N, 520V Ph-Ph
Maximum input voltage consumption	0,7 VA
lectrical safety	
Insulation	Double-insulated electric shock protection class II (IEC 61010-1)
feasurement accuracy	
Phase voltage measurement	0.5% ± 1 digit

Three-phase power analyzer, assembly on DIN rail

Code: M52000.

CVM-MINI-MC units require efficient MC series transformers, which are not included in the price. CVM-MINI-xx-ETH units are only available with a 230 Vac power supply

Three-phase power analyzer, assembly on DIN rail

Code: M52000.
