- Current measurement (depending on model) .../5 or.../1 A or.../250 mA or Rogowski-type sensors.
- Wi-Fi and Ethernet communications (Modbus TCP/IP).
- Integrated memory.
- \cdot With web Server to view, configure and download data.
- \cdot Compatible with the MyConfig app.
- Sealable with terminal cover.
- Display of THD% and up to the 31st harmonic (V, A).
- DIN rail format just 3 modules wide.
- High-contrast backlit display.
- 72 x 72 mm panel mount with front adapter

Application

- Control application in distribution panels and low- and medium-voltage connections where an analyzer has to be installed on the DIN rail due to space constraints.
- · Alarm control: Maximum value, minimum, delay and programmable interlocking.
- Logging of active or capacitive and inductive reactive energy.
- \cdot Capture and storage of instantaneous, maximum and minimum data of the electrical parameters measured.
