

Line-EDS-iMonitor, Data collection systems. Integrates WEBSITE. Front-end iMonitor

Code: M61068. DESCATALOGADO

> Protocol: Modbus (Circutor + generic) | XML

> Generic Modbus: 1

> Integrated Software: PowerStudio Scada PRO + iMonitor > Communications: Ethernet | Wi-Fi | RS-485 | Bus-Line

> Transistor output: 2> Mounting: DIN rail

Description

The Line-EDS-PS is a gateway with PowerStudio embedded. This module, by itself, lets you set up a supervisory and telemanagement (SCADA) system. By using the expansion modules of the line range or any Modbus (TCP or RTU) device on the market, it is able to integrate any process signal that is to be measured.

By programming the device with PowerStudio, you can incorporate any actuating logic for analogue or digital outputs, allowing you to create an automated management system that performs actions based on the input signals.

The device can be connected via cabled (Ethernet). The data displays, screens and reports can be accessed via the PowerStudio client or via a web browser thanks to the integrated web server

The Line-EDS-PS device has three models with different capabilities:

The **PSS** and **PSS PRO** variants offer the ability to program screens and reports, which allows you to have a SCADA system with a single device, without the need for PCs, servers or licences.

Application

The ease of programming in the PowerStudio environment allows a multitude of applications to be quickly integrated. Some possibilities are listed below by way of example:

- Electricity consumption monitoring system with active alarm management by e-mail (cos φ, maximum power, harmonics, etc.), sectorization of consumption, load management, invoice simulation, allocation of production costs, etc.
- o Efficient management of systems through hourly schedules (HVAC, lighting, etc.)
- o Efficient management of HVAC systems by regulating the supply setpoints.
- Control of pumping systems.
- o Monitoring of industrial processes.
- o Management of multipoint consumption (electricity, water, gas, etc.)
- o Analysis of equipment performance (compressed air, HVAC, etc.)

Efficiency Data Server

Code: M61068.

Specifications

AC power supply	
Installation category	CAT III 300 V
Consumption	11 28 VA
Frequency	50 60 Hz
Nominal voltage	120 264 V ~
DC power supply	
Installation category	CAT III 300 V
Consumption	2.5 7 W
Nominal voltage	190 300 Vdc
Mechanical characteristics	
Size (mm) width x height x depth	52.5 x 118 x 70 (mm)
Envelope	Self-extinguishing V0 plastic
Fastening	DIN rail
Weight (kg)	0,187
Environmental characteristics	
Protection class	IP30, Front: IP40
Relative humidity (without condensation)	5 95%
Storage temperature	-20 +80 °C
Working temperature	-10 +50 °C
Standards	
Certifications	UL 61010-1
Electrical safety, Maximum height (m)	2000
Standards	UNE-EN 61010-1, UNE-EN 61000-6-2, UNE-EN 61000-6-4, UL 61010-1
Communication Network	
Connection mechanism	RJ-45
Connection mode	DHCP ON/OFF (ON by default)
Protocol	Modbus RTU / Web server - XML
Technology / Type	Ethernet 10 /100 BT
User interface	
LED	5 LED
Digital transistor outputs	
Pulse width	1 ms

Efficiency Data Server

Code: M61068.

Quantity	2		
Туре	Optocoupler (Open-collector)		
Maximum frequency	500 Hz		
Maximum current	120 mA		
Maximum voltage	48Vcc		
Serial communication			
Protocol	Modbus RTU		
Technology / Type	RS-485		
Wireless communication			
Band
