

PS 100..240Vac

PS 100..240Vac, ReadWatt power supply,

Code: M62331.

Description

ReadWatt is an optical pulse collector equipped with an internal energy meter that can be queried through any Modbus/RTU communication master with the RS-232 or RS485 network protocol. The unit also has a digital transistor output for the purpose of transferring optical pulses to an external collector through a ratio programmed beforehand by the user (automated or external control element).

Application

- $\circ\;$ Fiscal energy meter measurement with optical pulse emitter.
- Accessory for maximum demand control applications.
- $\circ\;$ Instantaneous electric consumption monitoring.
