

STQ-24 200/5A, Split core current transformer

Code: M73718.

- > System: Single-phase
- > Class 3 Power (VA): 1
- > Measurement Range (A): 200/5
- > Input current: 200 A
- > Transformer type: Split core

#### Description

Open-core current transformers with compact dimensions for easy installation. This type of transformer is very easy to install and uninstall on compact panels where the reduced space makes it difficult to take current measurements. In addition, their open-core design means that they can take measurements without having to interrupt the electric supply. The primary current measurement range is from 100 A to 300 A using different secondary outputs (.../1A, .../5A or .../250mA) with a maximum admissible cable diameter of 24 mm.

#### Application

Quick and easy assembly are a fundamental aspect when taking temporary measurements in an electrical installation. **STQ-24** transformers can take energy measurements together with **CIRCUTOR**'s power analyzers or energy meters (**CVM-MINI, CVM-NET, CVM-C, CVM-B, EDMk**, etc.) without having to interrupt the electric supply. The open-core design of the transformer makes it very easy to install and allows installers to take electrical measurements in less time.

#### Specifications

| Safety factor (SF)   | 5   |
|--|---|
| Power  | 1 VA (class 3)  |
| Insulation voltage between terminals S1-S2   | 3 kV  |
| lechanical characteristics   |   |
| Size (mm) width x height x depth   | 53 x 70 x 43.2 (mm)   |
| Envelope   | PC LexanTM 940-701  |
| Weight (kg)  | 0,2   |
| nvironmental characteristics   |   |
| Thermal Class  | Class B (+130 °C)   |
| Protection class   | IP 20   |
| Relative humidity (without condensation)   | 15 85%  |
| Storage temperature  | -20 75 °C   |
| Working temperature  | -5 +40 °C   |
