

PI-23 60HZ

PI-23 60HZ, Clamp

Code: M801320010000 (CONSULTAR DISPONIBILIDAD)

- > Usefull diam.(mm): 25
- > Max. Current (A): 400
- > Frequency (Hz): 60

Description

Thanks to its open clamp, it can be used to measure currents at points where the power supply cannot be shut off

Application

- Check currents flowing in the line
- Evaluation of grid losses
- Conduct studies to prevent overheating
- PI-23 applications: This clamp is designed to measure the maximum current flowing in the line
- The clamp itself has a display to show the maximum current value measured
- A safety system is in place to cancel out the effect that the clamp has on the current when it is installed or removed from the line.

PI-23 60HZ

High voltage clamps

Code: M801320010000
