WGB-35-TB300, Residual current relay

Code: P16121.

- > Usefull diam.(mm): 35
- > Delay: INS
- > Sensitivity: 300 mA

### Description

Residual current protection device for the protection of people and property against fault currents, such as:

- Sinusoidal alternating currents and pulsating residual direct currents..
- Sinusoidal alternating currents, up to 1 kHz.
- Direct currents

For installations up to 125 A and sensitivities of 30 or 300 mA. INSTantaneous/SElective activation of the circuit breaker, circuit breaker with fast trigger coil or contactor.

### Application

All electrical installations where process continuity is critical and protection of persons (30 mA) and machines (300 mA) is required, with non-adjustable immediate or SElective activation.

- Computer systems (UPS systems)
- Speed drives
- Photovoltaic installations
- Electric Vehicle Charging systems
