

RECB-4P-63-300, RCCB with self-reclosing system, type B

Code: P26G33.

> Poles: 4 > In (A): 63 A

> Reclosing mode: Time > Sensitivity: 300 mA

> Breaking element: built-in > Type of protection: Type B

Description

RECB is a 4-pole type B RCCB for single or three-phase installatons linked to a smart reclosing motor, which enables safe reclosing of the corresponding RCCB. Compact device, installed as an RCCB, no need for any wiring between the motor and the RCCB.

This device's reclosing system or mode is timed to ensure continuity of power supply. The device has a blocking system to control operation in manual or automatic mode (reclosing enabled).

Application

Residual current protection device for all those electrical loads needing type B residual current protection and full, continuous power supply that are faced with unforeseen incidents not caused by electric insulation which cause the RCCB to trip.

- o Service sector: Air conditioning, cold storage rooms, UPSs, etc.
- o Industrial Sector: speed variators, UPSs, electrical machinery, industrial process systems.
- O Photovoltaic applications.
- o Electric vehicle charging points.
