

RBZ-50-480-60Hz-14%, Reactors III for detuned filters

Code: P731450017300

> L(mH): 1,95

> For capacitor: 2 x CLZ-FP-60/34,5-60Hz-HD

> Frequency (Hz): 60 > kvar (480 V): 50 > Un (V): 480

Description

CIRCUTOR has a complete range of detuned reactors, p = 7%, with a resonance frequency of 189 Hz for 50 Hz networks (or, on demand, 227 Hz for 60 Hz networks). This is the most frequent tuning value to avoid any resonance with the 5th harmonic and over. The set of capacitors-reactors absorbs part of the current of the 5th harmonic and acts as a detuned filter for higher frequencies. In some installations, anyway, other value of p(%) can be required, for example, 8,7 % (170 Hz), 14 % (134 Hz).... CIRCUTOR can manufacture reactors adapted to any power, p (%), frequency, voltage (Un ≤ 1000 VAC).

Reactors for low power rating, RZ range, are built with low losses magnetic sheets and coiled with aluminum wires. A terminal block for the connection of the reactor is fitted. Higher powers are covered by RBH range. These reactors are based on a magnetic sheet core with multiple air gaps, which provides them with excellent characteristics and low loss ratios.

Both RZ and RBZ reactors are subjected to a varnish vacuum impregnation, based on polyester resin, to increase the insulation, providing a greater mechanical resistance and reducing the level of noise.

Application

RZ and RBZ detuned reactors have been specially designed for their use in installations with capacitor banks with considerably high harmonic distortion rates. The reactors must be connected in series to the proper power capacitor for the satisfactory protection of the own capacitors and to avoid the resonance effects in the installation.

Specifications

AC power supply	
Frequency	60 Hz
Electrical characteristics	
Permanent overload	1,17 x ln
Linearity (5% L)	1,75 x ln
Maximum transient current	2 In (1 min)
Voltage	480 V,on request: up to 1000 V
Tolerance L	±5%
L value (mH)	1.95
Insulation voltage, circuit	3 kV
Electrical characteristic	
Overvoltage factor (p %)	14 % (160 Hz)
Environmental characteristics	
Thermal Class	class F (+155 °C) On request: class H (+180 °C)
Protection class	IP 00
Installation, location, position.	Inside
Ambient temperature	-10 +45 °C
Mechanical characteristics	
Envelope	Conductor type: Aluminium strip / copper cable
Weight (kg)	32
Standards	
Standards	UNE-EN 60289, IEC 60076
Protection	
Circuit breaker type	9125°C NC thermostat
