#### Description

The application of new technologies have allowed CIRCUTOR to reinvent the classic  $\mbox{CS}$  capacitor, manufactured for more than 35 years.

The spirit of innovation and proprietary technology used during the design of the new **CSB** capacitor have increased the working life of conventional prismatic capacitors by over 60%. This new series has improved all aspects of the previous models, offering our customers a capacitor that is longer lasting, safer and more cost-efficient.

#### Application

Its application is mainly based on the compensation of transformers and motors. In general, they are used for the compensation of installations with constant loads.
