CFB-26/30, Power capacitors for detuned filters

Code: R2412H. (CONSULTAR DISPONIBILIDAD)

> kvar (230 V): 25

> For reactor: RBZ-25-230 > Use voltage (V): 230

#### Description

The application of new technologies have allowed CIRCUTOR to reinvent the classic CS capacitor. The spirit of innovation and proprietary technology used during the design of the new CSB capacitor have increased the lifespan of traditional prismatic capacitors by over 60%. This new series has improved all aspects of the previous models, offering our customers a longer-lasting, safer and more profitable capacitor.

### **Application**

Its application is focused on the compensation of installations under fixed and variable loads (capacitor banks) with a high content of harmonics and/or the risk of resonance. Application for static systems (CFB-6B).
