

## OPTIM EMK6-600-440

OPTIM EMK6-600-440, Static capacitor bank

Code: R46438.

- > Cable section (mm<sup>2</sup>): 2x240
- > kvar (400 V): 496
- > kvar (440 V): 600
- > Optional circuit breaker (A) : 1000
- > Optional manual switch (A): 1000
- > Composition: 6x100
- > Use voltage (V): 440

### Description

The **OPTIM-EMK**-series capacitor banks have been designed for power factor correction in networks with fluctuating loads.

The power variations are relatively quick (measured in milliseconds) and the operation is thus carried out by thyristors, which are connected to a voltage controller board, so that the connection and disconnection of the capacitor is carried out with zero voltage difference.

Transients are prevented between the connection and disconnection of the steps, obtaining an immediate response to the load fluctuations.

### Application

The most common application is with individual loads or in installations where a quick compensation response is needed (for ex., welding units, motors for lifting units, lifts, etc.)

## OPTIM EMK6-600-440

Automatic capacitor banks with static system

Code: R46438.

### Specifications

#### Electrical characteristics

|                       |                                                                                                                  |
|-----------------------|------------------------------------------------------------------------------------------------------------------|
| Discharge resistance  | 75 V / 3 min                                                                                                     |
| Surge                 | 10 % 8 h over 24 h 15 % up to 15 min over 24 hours 20 % up to 5 min over 24 hours 30 % up to 1 min over 24 hours |
| Reinforcement voltage | 440 V (400 V)                                                                                                    |
| Voltage               | 400 V (other voltages on request)                                                                                |

#### Mechanical characteristics

|                                  |                                                    |
|----------------------------------|----------------------------------------------------|
| Size (mm) width x height x depth | 1200 x 1900 x 650 (mm)                             |
| Fastening                        | Vertical. Minimum distance between condensers 2 cm |
| Ventilation                      | Natural or forced according to options             |
| Weight (kg)                      | 334                                                |

#### Environmental characteristics

|                                          |                                                                                          |
