OPTIM FRF-100-440, Fixed capacitor with armonic filter

Code: R5X3B0.

- > Cable section (mm<sup>2</sup>): 70
- > kvar (400 V): 83
- > kvar (440 V): 100
- > Use voltage (V): 440

### Description

---

The **FRF / FRM** Series capacitor banks with detuned filters have been designed for power compensation purposes in motors and transformers with a constant load level, a high content of harmonics and where there is a risk of resonance. Including:

- **FRF**: general protection with NH-00 fuses with a high rupture power (HRP) for the capacitor.
- **FRM**: general circuit breaker protection for the capacitor.

### Application

---

Its application is mainly based on the compensation of transformers and motors. In general, it is used for the compensation of installations under constant loads and where there is a high content of harmonics in the network.
