SVG-3WF-30k-480

Code: R7NST3. (CONSULTAR DISPONIBILIDAD)

- > static var generator
- > System: 3 wires
- > 230...480 V
- > Q (kvar): 30
- > Phase current: 44
- > EMI filter: 1

Description

SVG Static Var Generator are the most accurate reactive power compensation solution, for both unbalanced three-phase systems and facilities with inductive and capacitive reactive power. It can be used in three-phase industrial, commercial or service installations and is not affected by the harmonics of the installation. A system with greater safety and very little maintenance.

The following features and functions are implemented:

- Unit reactive power compensation capacity (inductive/capacitive) of 30 kvar.
- Small wall-mounted cabinet. Its compact dimensions make it easy to install.
- Voltage and frequency multi-range (50/60 Hz).
- Immunity to harmonic currents.
- $\cos\phi$ range of 0.7 inductive...1...0.7 capacitive.
- Online operation monitoring.

If higher power factor correction capacities are required, up to 100 units can be connected in parallel.

Application

The perfect solution for individual loads or facilities with a large number of single-phase or three-phase loads, both inductive and capacitive. Also for facilities where the load fluctuates over short periods of time. For example, loads from bridge cranes, welding kits, lifts, drilling/grinding operations, and data centres.

Static Var Generator

Code: R7NST3.

Specifications

AC power supply

Frequency	50 / 60 Hz ± 5 %
-----------	----------------------

Electrical characteristics

Voltage THD	25%
Maximum phase current	44 A (RMS)
Maximum neutral current	44 A (RMS)
Voltage	230 - 400 V ph-ph (± 10 %)

Mechanical characteristics

Size (mm) width x height x depth	435 x 710 x 257 (mm)
Connection type	Network (power supply): toe, Current: 6-pole connector, RS-485: 3-pole connector, Ethernet: RJ-45
Weight (kg)	32

Environmental characteristics

Protection class	IP 21 (other, please consult)
Relative humidity (without condensation)	0 ... 95 %
Storage temperature	-20 ... +50 °C
Working temperature	-10 ... +45 °C

Current measurement circuit

Consumption	1,5 VA por transformador
Maximum input current consumption	1050 W
Transformation ratio	3 or 2x transformer: 5/5A ... 5000/5A Class 1 or better (0,5 – 0,2- 0,2S) Frequency response up to 2500Hz / 3000 Hz (60 Hz)

Standards

Electrical safety, Maximum height (m)	2000
Electrical safety, Installation category	CAT III 300 V
Electrical safety, Contamination level/class	Category 2
Standards	UNE-EN 62477-1, UNE-EN 55011, IEC 61000-6-2, IEC 61000-6-4, IEC 61439-1

User interface

Display type	Touch 3.5" color
--------------	------------------

Features / performance

Reactive power compensation (Kvar)	Selectable: 0.7 inductive ... 0.7 capacitive
Filtering / Response time	20 ms
Parallel assembly/installation	Up to 100 units, with different gauges. CTs connection only to the "master" unit

SVG-3WF-30k-480

Static Var Generator

Code: R7NST3.

Advanced management algorithm: Maximizes the life of the devices (alternate operation of devices). Maximises operational efficiency (Only the necessary filters are activated). Allows redundancy (system operation in the event of device malfunction).
