CHV-T 300/3,3, Three-phase MV power capacitors

Code: R8K300000330E

> BIL (kV): 20/60
> Measure: Three-phase
> Frequency (Hz): 50
> Q (kvar): 300
> Un (V): 3300

Description

CHV medium-voltage capacitor, made up of different basic capacitive elements.
These basic units are connected in series and parallel with the purpose of obtaining the power at the necessary voltage.

All the elements are protected by an internal fuse. This fuse is disconnected if a fault is detected, isolating only the basic unit that has been damaged. Internal fuse protection ensures greater system safety and service continuity.

Application

CHV-T capacitors are used to build static and automatic capacitor banks of up to 12 kV.

The stainless-steel box of the **CHV-T** makes it a versatile product that can be used in indoor and outdoor applications.
