Description

The Urban CCS range is the perfect fast-charging solution for small, private settings. It can be installed on the wall or floor thanks to its two models (wallbox and post). This same compact and robust design is also present in its aluminium enclosure, suitable for all types of environments. The **Urban CCS** has a DC charging power of 25 kW, thus sidestepping the power limitation imposed by chargers on board electric vehicles with AC charging.

Application

The Urban CCS range has been developed to offer a fast-charging solution in environments where there is no high-power electrical infrastructure (small electric vehicle fleets, dealerships, carsharing companies, small private car parks, etc.) to improve the charging speed of electric vehicles without a major investment.
