

### **URBAN MASTER CCS1**

URBAN MASTER CCS1, DC recharging post

Code: V10731.

- > Communications: Ethernet
- > Output type: 150 ... 920 Vcc 70 A 25 kW
- > Connector type: CCS Combo 1 [CC]
- > Grid type: Three-phase
- > Charge mode: 4
- > No. Sockets: 1
- > Earth leakage protection: Type B

### Description

The URBAN MASTER/SLAVE CCS solution consists of a combination of a smart Master charger that provides communications and has an RFID reader, 8" touchscreen and an optional bank card payment system that controls a set of Slaves.

With a compact and robust design and an aluminium enclosure for all types of environments, the Urban CCS is the fast-charging version of Circutor's venerable Urban line, with a DC charging power of 25 kW, thus sidestepping the power limitation imposed by chargers on board electric vehicles with AC charging.

The system as a whole works as if all the chargers were smart, either by connecting the Master to a manager via OCPP, or independently by setting up a white list of users for the group.

#### Application

The Urban CCS range has been developed to offer a fast-charging solution in environments where there is no high-power electrical infrastructure, and where AC charging is insufficient. It is ideal for charging small fleets of electric

vehicles, dealerships, carsharing companies, small private car parks, etc., without making a major investment. This device can be installed on the wall or floor thanks to its two models (wallbox and post).
