Description

The **RAPTION 150C** chargers are perfect devices for fast charging electric vehicles that need a powerful boost to get back on the road as soon as possible. It consists of a compact charger with up to 150kW of power, which can be distributed simultaneously through 2 plugs at 75 kW each in the dual-hose version. These devices reduce electric vehicle charging times, since they are capable of extending a car's range by up to 400 km in 20 minutes, thus making long journeys possible. In addition to the high charging power, this device has all the features needed for ease of use and convenience, such as a touchscreen with instructions, charging status LED indicators, communications with management platforms in the cloud and a contactless payment terminal for bank cards.

Application

The **Raption 150C** is perfectly suited to various scenarios where the EV charging time is a priority for the final user, such as service stations and rest areas in expressways, charging spaces in shopping centres, professional fleets of passenger cars and urban bus fleets, and others.
