### Description

The **RAPTION 80C** is a fast charging station for electric vehicles that significantly reduces charging times in short-term car parks. This model has a charging capacity of 80 kW (266 A) in Boost mode, regardless of the battery's working voltage. It also allows charging two EVs simultaneously by offering 40 kW per connector, which provides flexibility and adaptability to the charging needs of both current and future vehicles, thus anticipating market demands.

In addition to its high charging power, the device offers an excellent user experience with a design intended to help people with reduced mobility, thanks to the height of the elements and to the vehicle connection system. It has a 15" anti-vandalism touchscreen that provides a very intuitive interface to interact with the device. It also has LED indicators for the charging status, courtesy lights and the option to install a cable management system, which makes it easier to connect the vehicle charging cables. It also features a contactless payment terminal.

Like all models in the **RAPTION** range, the **RAPTION 80C** is compatible with our dynamic power management system (DLM) to regulate the charge without exceeding the contracted power of the installation. The device has an OCPP communication protocol to integrate it with management platforms. It can also be configured as a Master in Master-Slave solutions

### Application

The **RAPTION 80C** is designed for situations that require charging electric vehicles in a short time, such as service stations, rest areas on motorways, as well as in settings where we fast charging solutions are desired, such as designated charging spaces in shopping centres, charging hubs, fleets of professional vehicles, etc.
