

COFRET-VE6-2P-20A

COFRET-VE6-2P-20A, Protection box

- Code: V41231.
- > Módules: 6
- > Poles: 2
- > Surge Protection (SPD): No
- > System: Single-phase
- > In (A): 20
- > Key: 1
- > Earth leakage protection: Type A
- > Circuit breaker protection: 20 A

Description

COFRET boxes are designed to offer electrical protection in compliance with the **ITC-BT-52** standard for infrastructures designed to charge electric vehicles. The devices have a Type A RCCB for direct or indirect exposure protection, and a C-curve circuit breaker to protect the recharging units in the event of overloads or short-circuits. If the installation does not have overvoltage protection, a model is available that includes both permanent and transient surge protection.

Application

The COFRET box is absolutely essential when installing any single-phase electric vehicle charging point.

Circutor

COFRET-VE6-2P-20A

Protection box for single-phase charging points

Code: V41231.
