Digital Link SIM VPN WW - Multi 5

,

Code: W10315.

Description

In industry, infrastructure, or buildings, efficiency and reliability are key. **Scout** complements your equipment Circutor, offering remote access and autonomous analysis of your electrical data while highlighting only the essentials.
Monitor multiple installations and collaborate in real-time without technical complications. Stay in control, optimize performance, and manage your installations quickly and efficiently.

Main Features

Monitoring and Visualization

· Quick and simple connection without complex configurations
· Remote access for configuration and firmware updates
· Dynamic dashboards with real-time metrics and trends
· Push notifications from the mobile app to stay always informed

Analysis and Focus

· Continuous automatic analysis of electrical data
· Filtering and prioritization of relevant events
· Contextual information to understand the "what" and "why"
· Detection of patterns and key deviations to anticipate issues

Communication and Reporting

· Integrated collaborative tools for teamwork
· Real-time chat linked to incidents and analysis
· Quick generation of standard and customized reports
· Automated periodic report delivery

Secure and Simple Multi-site Monitoring

· Centralized management of multiple installations from a single platform
· Secure and encrypted connection for data protection
· Certification **ISO 27001** for maximum trust and compliance
· Open and documented API for integration with external systems
